

WISeKey Trust Services

## CertifyID Managed PKI Services

### Description

WISeKey, as an enterprise-grade trust services provider always made focus on making easy for our customers to make use of digital certificates in their internal processes. A common requirement from our customers is to control the delivery of certificates to their employees or clients by acting as a Registration Authority and manage autonomously the issuance process. WISeKey's Managed PKI (MPKI) offering provides to our customers the tools to issue fully recognized certificates to their users.

### WISeKey Offering

WISeKey provides MPKI to issue Personal, SSL or IoT certificates issued by our existing CertifyID Certification Authorities or by a dedicated certification authority for the customer.

Through MPKI our customers can manage:

- S/MIME certificates, to protect email communications, ensuring the sender identity and enabling encryption
- Certificates for Document Signature, including PDF signatures
- SSL Certificates, to secure the corporate web and application servers
- IoT Certificates to authenticate connected devices

WISeKey Certificates can be adapted to suit more than one purpose.

### Features & benefits

- Customers don't need to invest in a new infrastructure; MPKI is delivered as a managed cloud service
- The MPKI interface can be used to manage personal ,SSL and IoT certificates
- Possibility to issue "branded" certificates. WISeKey can dedicate a Certification Authority so certificates appear not issued by WISeKey but by the customer CA
- Our Certificates are trusted worldwide. Customers benefit of our WebTrust accreditation and certificates used for e-mail security, authentication, SSL or digital signatures will be recognized inside and outside the organization
- Web browser GUI. Easy access for Administrators and End Users
- WISeKey offers a programmatic REST API to enable the integration with customer's corporate systems and automate the certificate management

### Why WISeKey MPKI is different?

WISeKey is a leading eSecurity company, with 20 years of experience in information security and trusted digital identities. Our strategic location in Switzerland and partnership with OISTE foundation set us apart from other digital security providers, in that we can offer geopolitical neutrality. Our certificates are trusted globally by a wide range of customers, governments, business, and individual website hosts, who continue to operate in safe and secure environment thanks to WISeKey's digital security solutions. WISeKey's portfolio offers globally trusted certificates with the highest assurance and warranties, at a really competitive price.

**All Certificates aren't equal... Choosing WISeKey is the wise choice**

WISeKey is a Certification Authority fully compliant with the Webtrust requirements for Personal and SSL certificates

Our Certificates are recognized by Adobe for PDF document signature

Web hosting and ISP customers can also benefit of our Reseller Program to offer personal and SSL certificates to their customers.
